What Is So Special about “Nanoparticles”?

**1,000X
BETTER**

5X

**FASTER
ABSORPTION**

15X

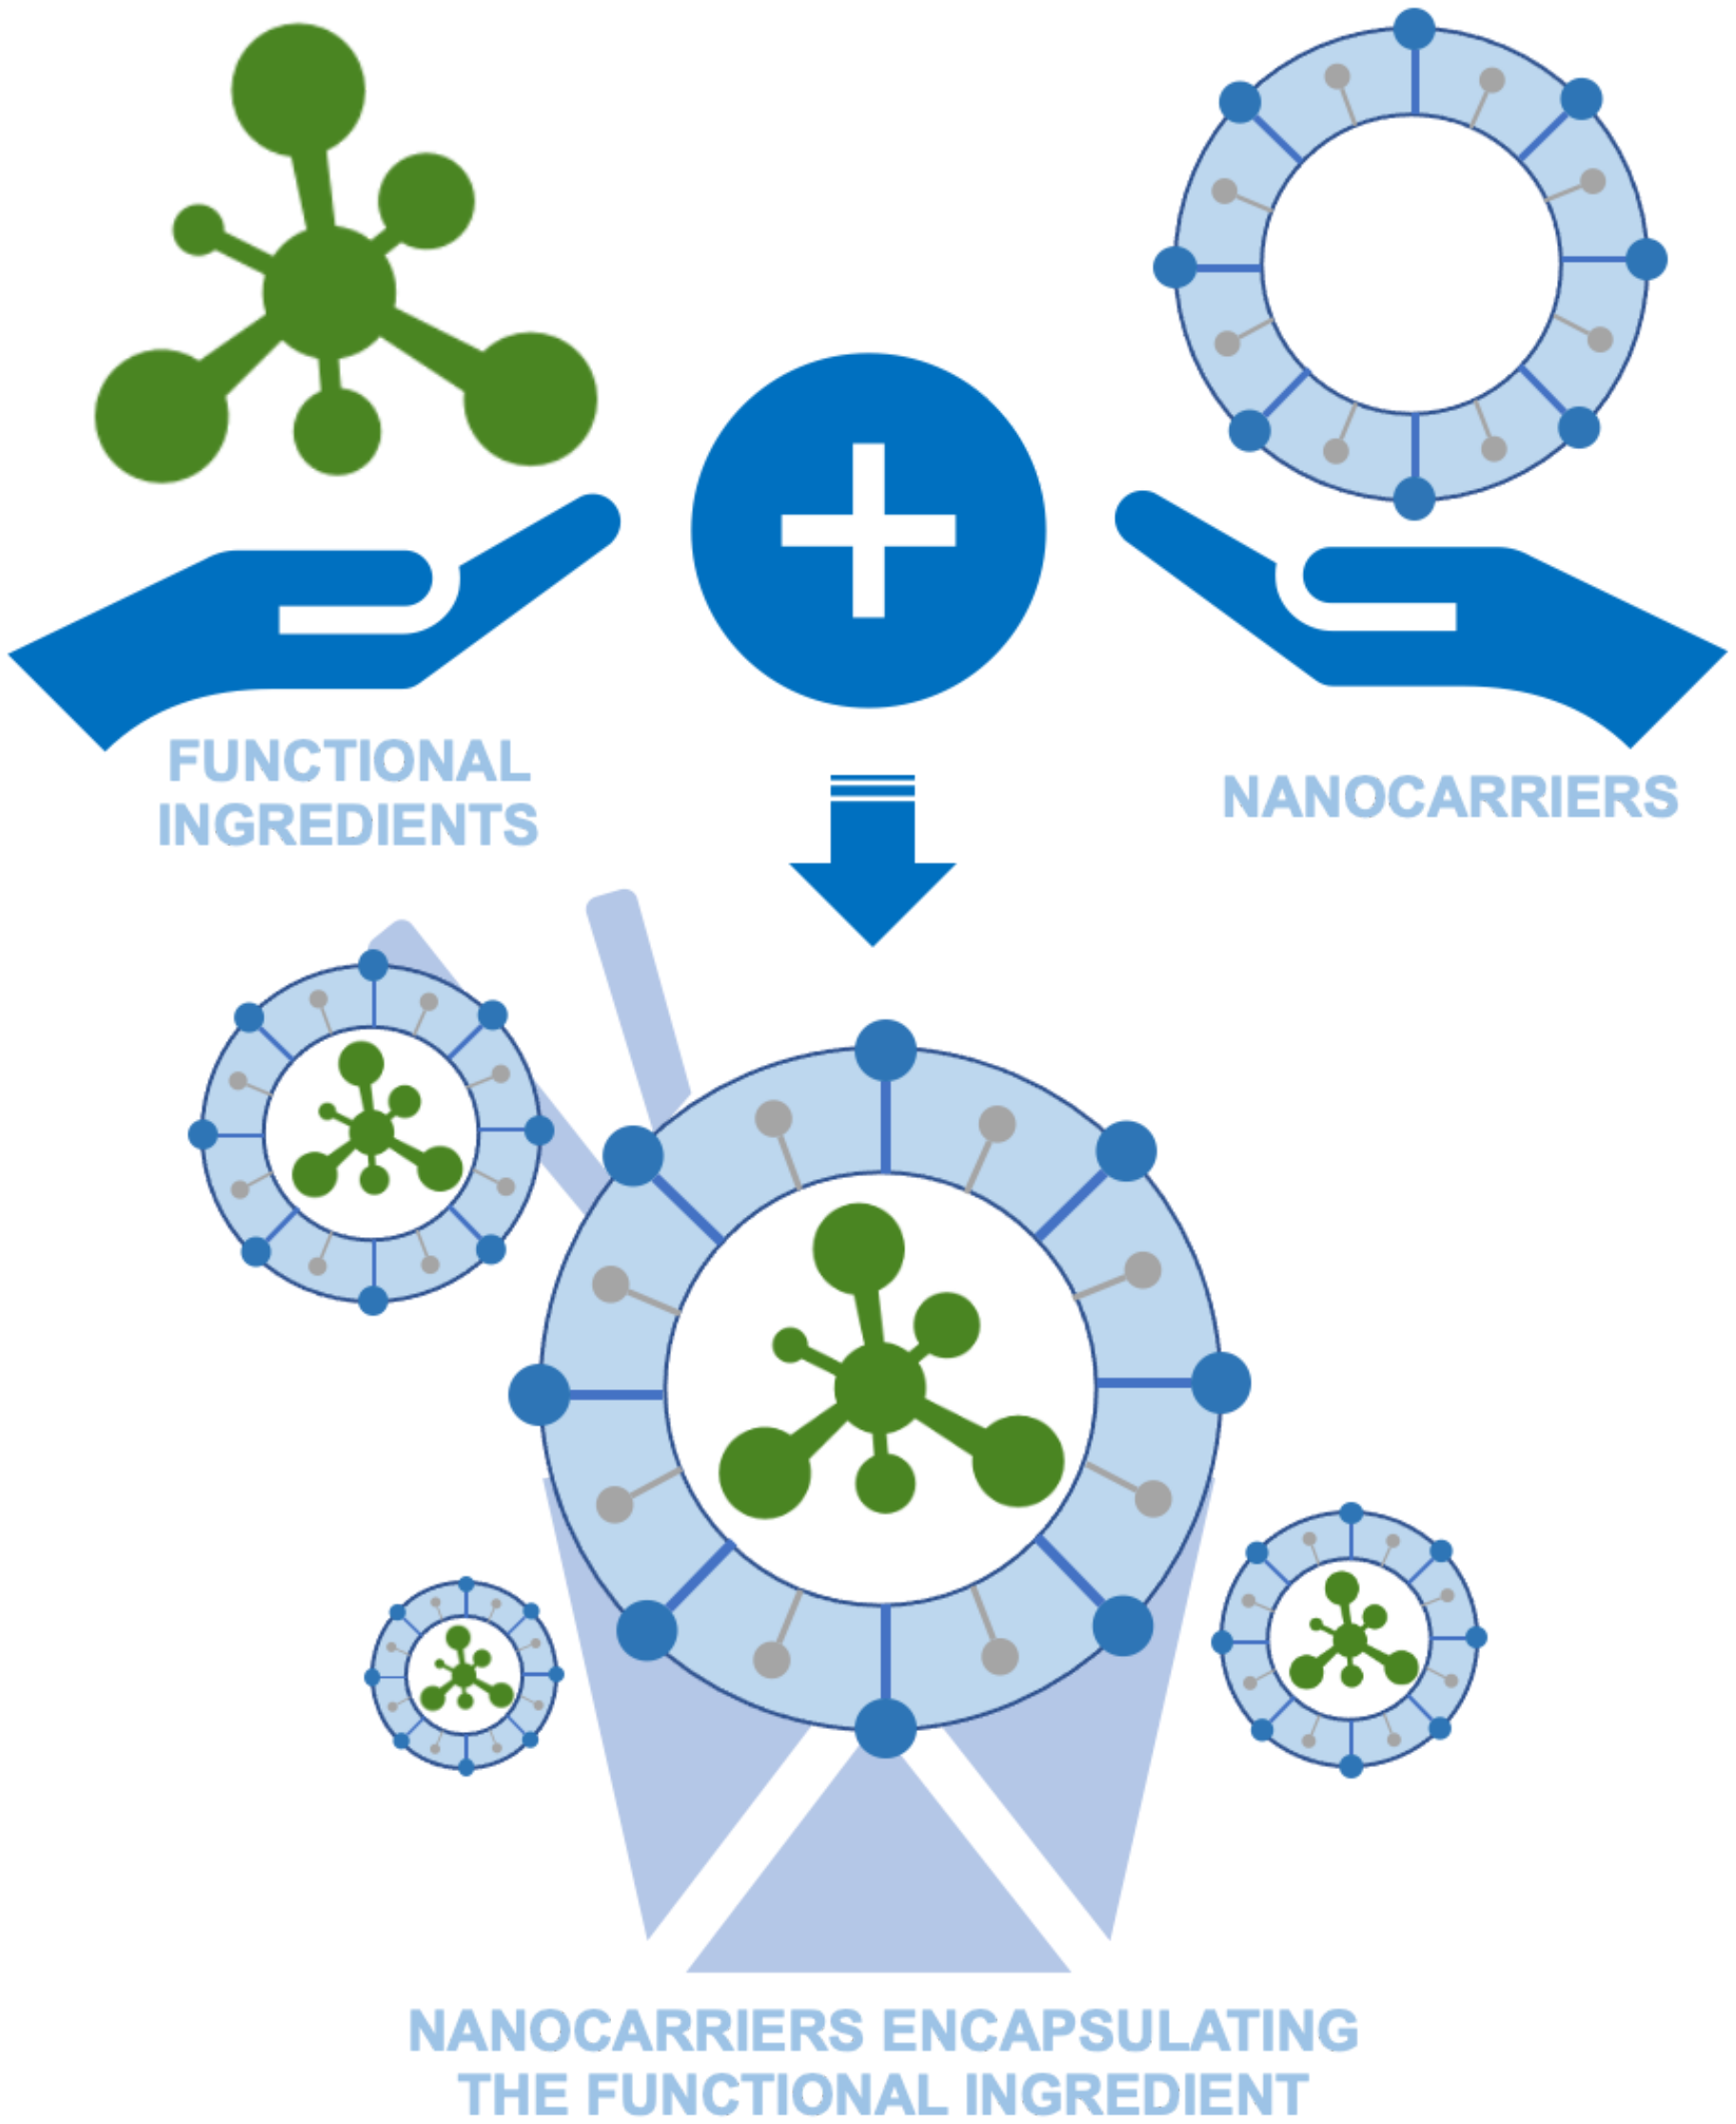

**LESS LOSS IN
BODY SYSTEM**

20X

**HIGHER
BIOAVAILABILITY**

-WHAT WE DO-

PACKAGING A FUNCTIONAL INGREDIENT WITHIN NANOPARTICLES

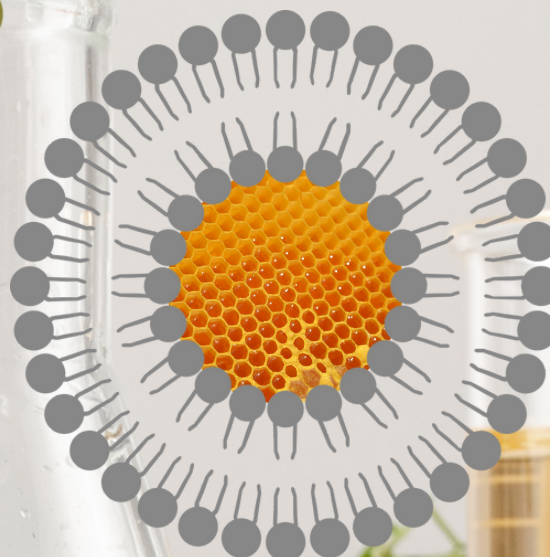

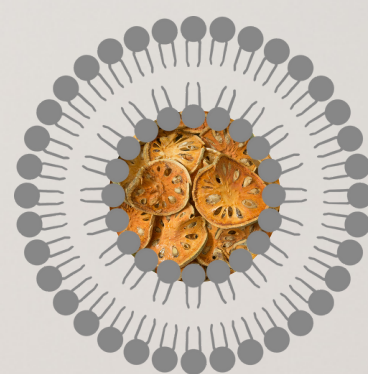

In Naive Innova, we offer customized nano-encapsulation services and scale up nanoparticle synthesis and processing from the lab-scale process into a realistic version of the large-scale manufacturing process for commercialization.

**Our team has expertise
in developing diverse types of organic
nano-carriers.**

...

**We provide custom synthesis
of nanoparticles
encapsulating bioactive
compounds derived from
natural extracts & Herbs**

**These so-called "BOTANICAL NANOPARTICLES" or
"Phytonanoparticles" can be applied to food products,
dietary supplementd, and cosmeceuticals.**

OUR SERVICES

OUR MISSION IS TO

ACCELERATE NEW BUSINESSES TO CREATE "VALUE-ADDED" PRODUCTS BY USING NANOTECHNOLOGY.

1

RESEARCH & DEVELOPMENT

Design and develop new nano-products tailored to the goals of the customer.

2

NANO-TESTING

Full characterization of synthesized nanoparticles as well as their stability and biological activities (both in vitro and in vivo).

3

NANO PLUG-IN

Provides supports in equipped process development lab for upstream and downstream process optimization as well as quality control, scale up from 1 to 1,000L per Day.

4

NANO-ACADEMY

The programme aims to deliver theoretical and practical training on important aspects and applications of nanotechnology-based drug delivery system

5

FREE CONSULTATION

free consultations for all products and services. We will help you think through your ideas and provide examples for how we can make them happen.

Introducing Our

Chief Executive Officer

Dr. Teerapong Yata

Dr. Yata has been an outstanding researcher in the academic field and well-accepted among the entrepreneurs in the innovative veterinary medicine industry. He received numerous awards from International Innovation competitions. In addition, he has invented several inventions and filed those innovations for patents and petty patents. His publications, which were published in remarkable international journals, mainly focus on the development of high-efficiency delivery systems using nanotechnology
