INNOBILE CO., LTD

INNOBILE OVERVIEW

- ❖ Company Name INNOBILE CO., LTD
- ❖ CEO KIM TAE YONG
- ❖ Founded April, 2014
- ❖ Address Head Office : Room 635, 62, Seongseogongdan-ro 11-gile,
Dalseo-gu, Daegu, Korea
China Office : Room 612, No. 36, South Yutian Road, Jiading
District, Shanghai, China
- ❖ Business Areas ■ Automotive electric parts manufacture and sale
■ General machinery electric components manufacture and sale
■ General machinery motor parts manufacture and sale
- ❖ Core Technology ■ Motor control
■ Electronic circuit design and software development such as
ECU for vehicles.
■ Automotive communication(CAN, LIN, etc.) and Wireless
communication
■ Machinery components design
- ❖ Development Capabilities ■ Electric Water Pump(EWP), Motor Controller of Automotive
■ Electronic Parts(Cooling Fan, Electric Vacuum Pump)
■ Personal e-Mobility e-Power Train(Motor Controller, Cluster)

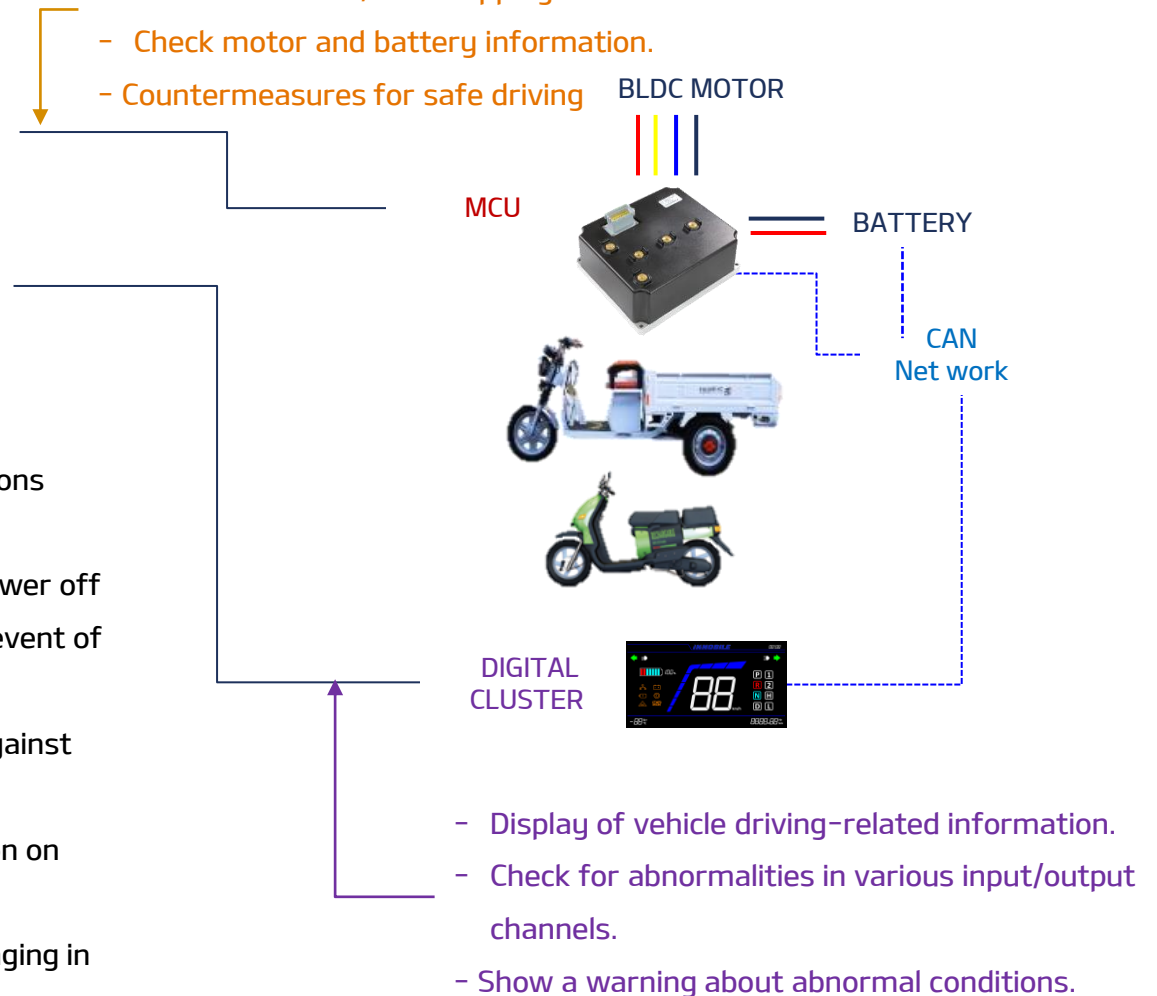

Core Technology : Safe driving platform through real-time driving situation monitoring based on CAN communication.

❖ Real-time driving status cognitive solution.

- Real-time monitoring of a series of driving situations such as below
- : Power on -> Driver, speed up/down.-> stop -> power off
- Support safe driving as a countermeasure in the event of a vehicle abnormality.
 - > Protecting the vehicle system by protecting against overvoltage and overcurrent.
 - > Prevent accidents by sharing driver information on abnormal conditions.
 - > Support safe driving (speed limit, etc.) by engaging in actual driving.
- Easy defect identification. - A/S response glass.

- Identifying driving information such as system power, acceleration and deceleration, and stopping.
- Check motor and battery information.
- Countermeasures for safe driving

- Display of vehicle driving-related information.
- Check for abnormalities in various input/output channels.
- Show a warning about abnormal conditions.

Products Summary

Item	Product Picture	Product Features	Specification	Remark
Motor Control Unit (MCU) (IBMC6040-SDTZ)		<ul style="list-style-type: none"> Rated power 4kW(Maximum 8kW) BLDC motor controller Trapezoidal control Self-diagnosis and display <ul style="list-style-type: none"> - Overvoltage, overcurrent, overload Non-slip at heavy gradient 	<ul style="list-style-type: none"> Input voltage range : 42 ~ 86V Rated / Maximum current : 80A / 150A(30sec) Rated / Maximum power : 4kW / 8kW Communication : CAN2.0A), UART Operating temperature : -20 ~ 85°C (Based on IBMC6040-SDTZ) 	<ul style="list-style-type: none"> Internal structure  CPU  Inverter  Power - Inverter and power module: Common according to output - CPU Module: Change according to SW Controller Act
Digital Cluster		<ul style="list-style-type: none"> Customizing User-Interface Battery remaining capacity with 10 columns Various information <ul style="list-style-type: none"> -> Vehicle system error, voltage, current -> Mileage, driving time and vehicle identification number 	<ul style="list-style-type: none"> Input voltage range : 9 ~ 18V(12V) PCB 4layers Power consumption : 50W Communication : CAN2.0A (500kbps) EX_IO : 8bit Input / 16bit Output 	<ul style="list-style-type: none"> Active view area (mm) : 108 x 61
Vehicle Control Unit (VCU)		<ul style="list-style-type: none"> Vehicle system control based on CAN communication with cluster, MCU and BMS Regenerative braking, charging control Vehicle driving status measurement based on IMU 	<ul style="list-style-type: none"> Input voltage range : 9 ~ 18V(12V) Standby current : 100mA DI/O : Input 16ch / Output 16ch Analogue input : 8ch PWM output : 4ch Communication : CAN2.0A, SPI, I2C 	<ul style="list-style-type: none"> High-tier vehicle controller for micro-EV
Body Control Unit (BCU)		<ul style="list-style-type: none"> Vehicle input and output signal processing <ul style="list-style-type: none"> -> Left and right indication -> Forward and backward -> Speed regulation and braking CAN Communication <ul style="list-style-type: none"> -> Easy to identify the causes of I/O errors 	<ul style="list-style-type: none"> Input voltage range : 9 ~ 18V(12V) Power consumption : 50W Process time : 10ms Communication : CAN2.0A (500kbps) DI/O : Input 12ch / Output 12ch AI/O : ADC 12bits / 6ch 	<ul style="list-style-type: none"> Basic body controller for two-wheel electric bikes, three and four-wheel electric vehicles
Network Driver (NWD)		<ul style="list-style-type: none"> Customizing according to customer specifications. 	<ul style="list-style-type: none"> BLE 4.2 OR 5.0, LTE-CAT/MI, GPS CPU : Cortex-M3 (120MHz) CAN : 2ch (2.0A, 2.0B) 	<ul style="list-style-type: none"> Customer's vehicle installation test.
DC-DC Converter		<ul style="list-style-type: none"> 150W grade high frequency transformer Converter circuit PUSH-PULL topology Protection functions 	<ul style="list-style-type: none"> Voltage range : 40~96V Rated / Maximum current : 10A / 15A Control : Half-Bridge PWM Protection : Over-Voltage, Over-Current, Over-heat 	<ul style="list-style-type: none"> Release sample on 21 Q4.

Motor Control Unit (MCU) Specification

❖ Highlights

❖ Specification

Performance	Description	Product Name	IBMC2402-ENSS	IBMC6040-SDTZ IBMC6040-ENSS	IBMC7240-SDTZ IBMC7240-ENSS	IBMC7275-SDTZ IBMC7275-ENSS	IBMC4415-ENSS
Applications	<ul style="list-style-type: none"> Driving motor control for e-mobility and micro-mobility vehicles 	Rated Power	200W	2.5kW	4kW	7.5kW	15kW
Features	<ul style="list-style-type: none"> Hardware design following automotive electronic parts standard(main electronic components by automotive grade) High-efficiency motor control : 90% ↑ (Sinusoidal), 85% ↑ (Trapezoidal) Vector control for sinusoidal motor control : FOC (Field Oriented Control) <ul style="list-style-type: none"> Self-developed encoder based torque control, speed control, position control 	Rated Voltage	24V	48V / 60V	48V / 60V	60V / 72V	144V
		Input Voltage Range	18V~29V	42V~86V	42V~86V	60V / 84V	120V / 180V
		Rated Current	15A	50A / 42A	80A / 65A	130A / 100A	120A / 100A
		Maximum Current	30A	100A / 85A	150A / 130A	250A / 200A	250A / 200A
Functions	<ul style="list-style-type: none"> System fault diagnosis and display (connection with cluster) : A/S convenience Self-inspection and countermeasure : overvoltage, overcurrent, overload Safe driving : non-slip at heavy gradient, speed control for downhill Regenerative braking, charging 	Operating Temperature	-20°C~85°C	←	←	←	←
		Storage Temperature	-40°C~120°C	←	←	←	←
		Motor Control	Trapezoidal	Trapezoidal Sinusoidal	Trapezoidal Sinusoidal	Trapezoidal Sinusoidal	Sinusoidal
		Communication	CAN 2.0A	←	←	←	←

Vehicle Driving Safety and Optimization System

❖ Vehicle Monitoring Program

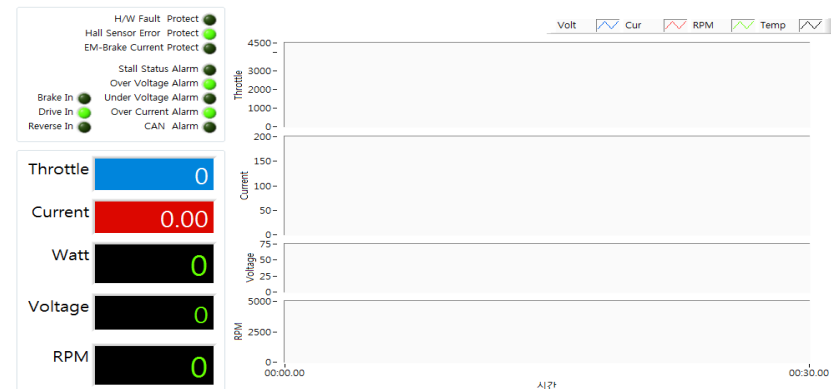

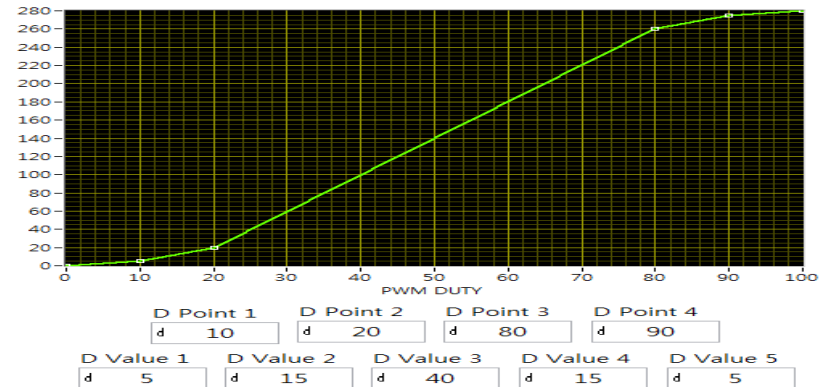

- Based on vehicle inside communication, monitoring real-time status
- Monitoring Driving information
- Checking Digital cluster operation
- Battery remaining capacity
- Motor and Inverter status such as voltage, current
- Alarm vehicle error and take safety action
- Easy to find out the error at A/S service

Division	Requirements	Description
구동 제어	Status	Motor RPM
	Status	Battery Voltage
	Status	Load Current
	Analog Input	Throttle input
	input	Parking Brake Input Switch Signal
	input	Drive Mode Input Switch Signal
	input	Reverse Mode Input Switch Signal
	Output	EM_Brake Status Signal
	Output	Parking Brake Status Signal
	Output	Gear Ratio
	Motor Index Count Value	모터 반바퀴 돌 때마다 Count 하여 출력

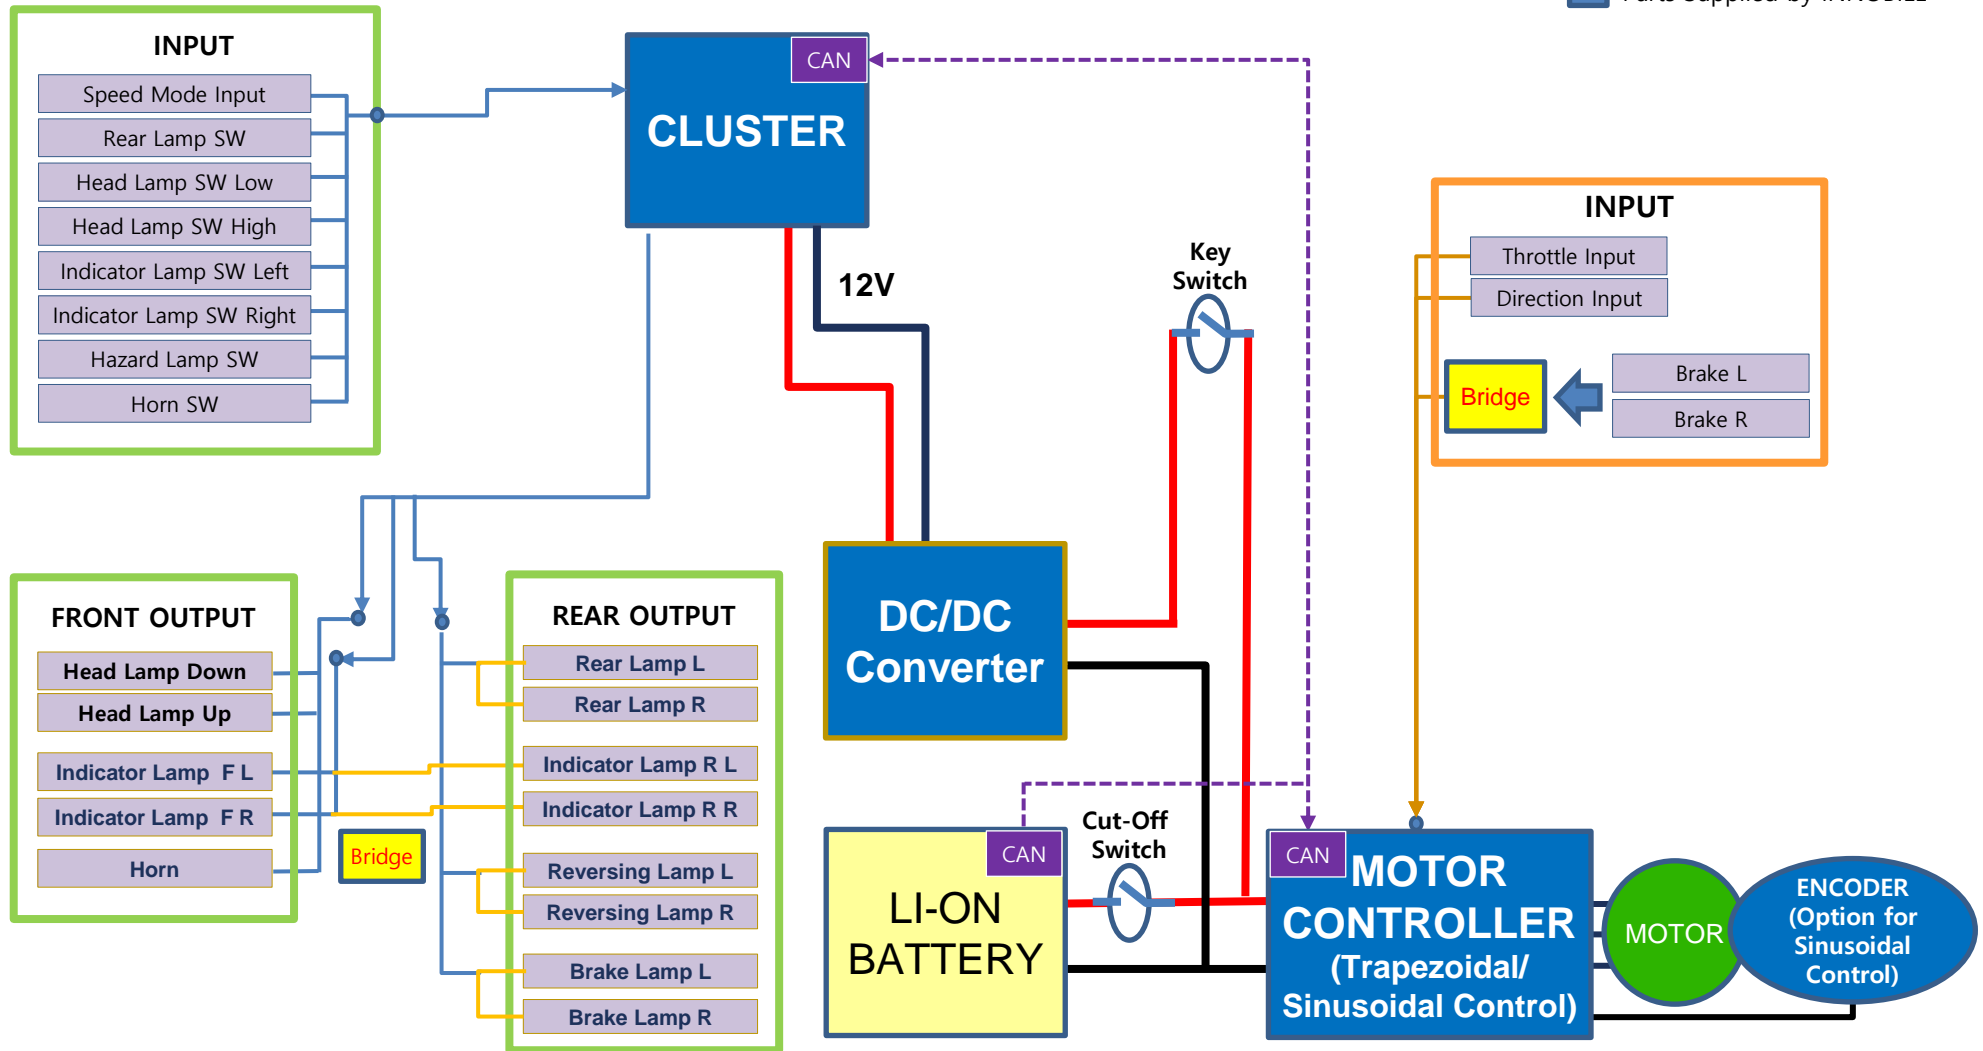

❖ Vehicle Option Tool

- Driving mode set-up
- Change and set up start, accelerating pattern
- Upon vehicle system, optimization driving condition
- > Motor, Battery and Inverter
- Various kinds of driving option

CAN-based Cluster System: 2 and 3~4 Wheel Electric Vehicles (Standalone)

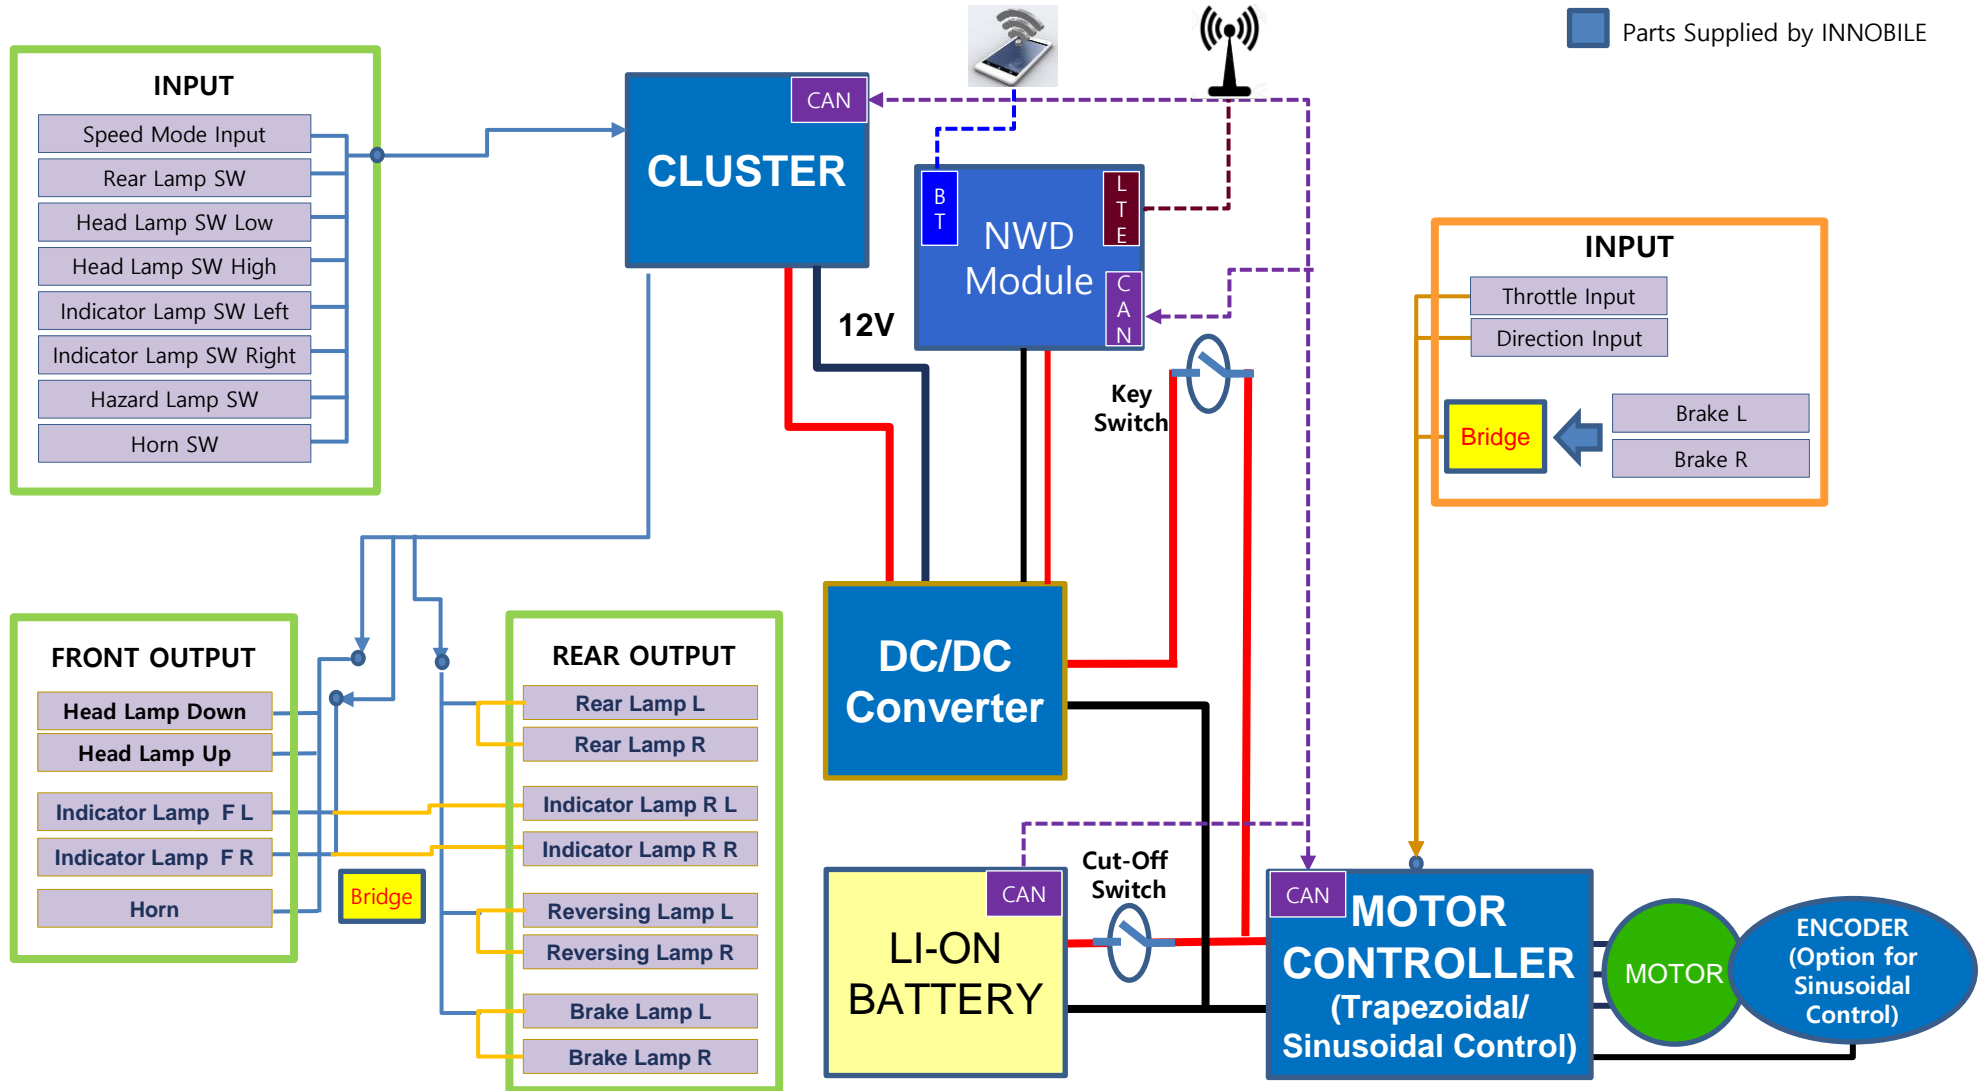

Parts Supplied by INNOBILE

** Illustration : Above system is based on Lithium-ion Battery.
CAN Communication is not applied for Lead Acid Battery system.

CAN-based Cluster System: 2 and 3~4 Wheel Electric Vehicles (Connected)

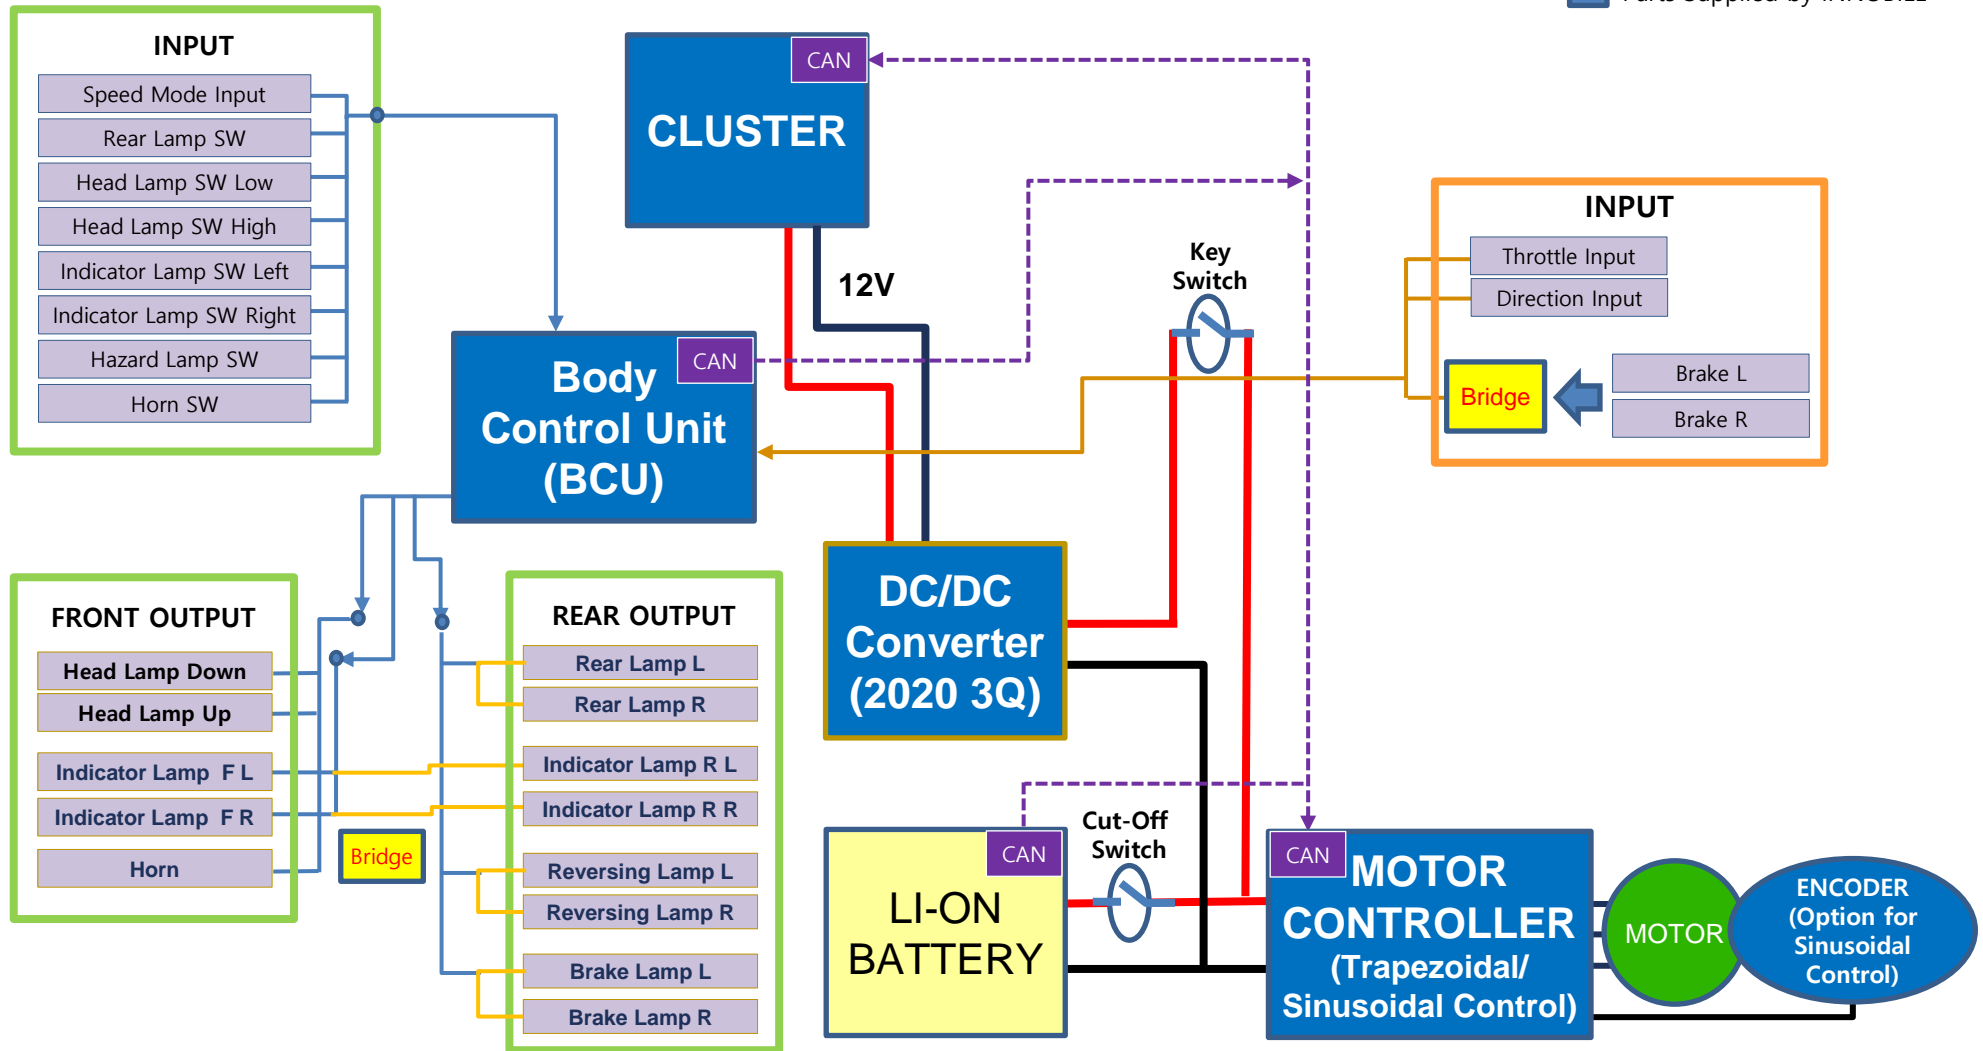

Parts Supplied by INNOBILE

** Illustration : Above system is based on Lithium-ion Battery.
CAN Communication is not applied for Lead Acid Battery system.

CAN-based Body Control System : 2 and 3~4 Wheel Electric Vehicles (Standalone)

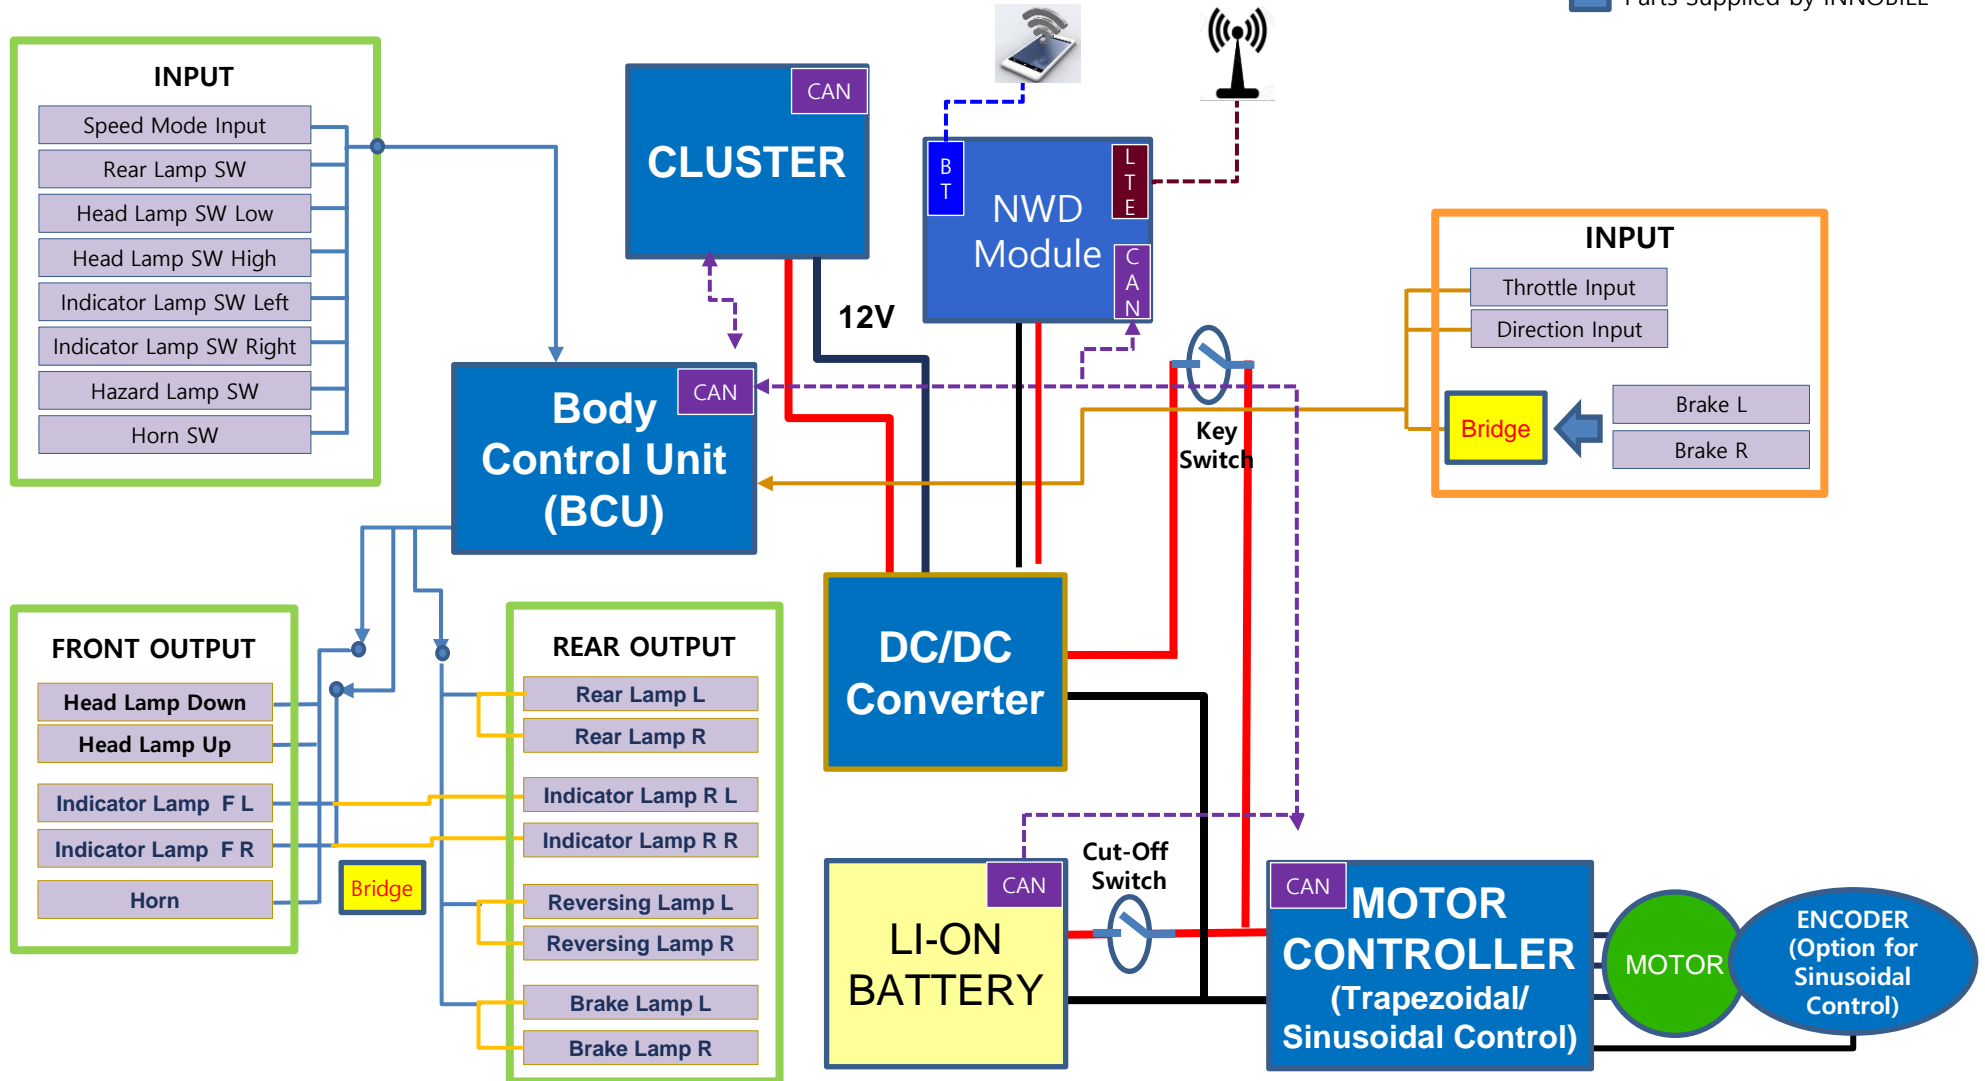

Parts Supplied by INNOBILE

** Illustration : Above system is based on Lithium-ion Battery.
CAN Communication is not applied for battery and motor controller in Lead Acid Battery system.

CAN-based Body Control System : 2 and 3~4 Wheel Electric Vehicles (Connected)

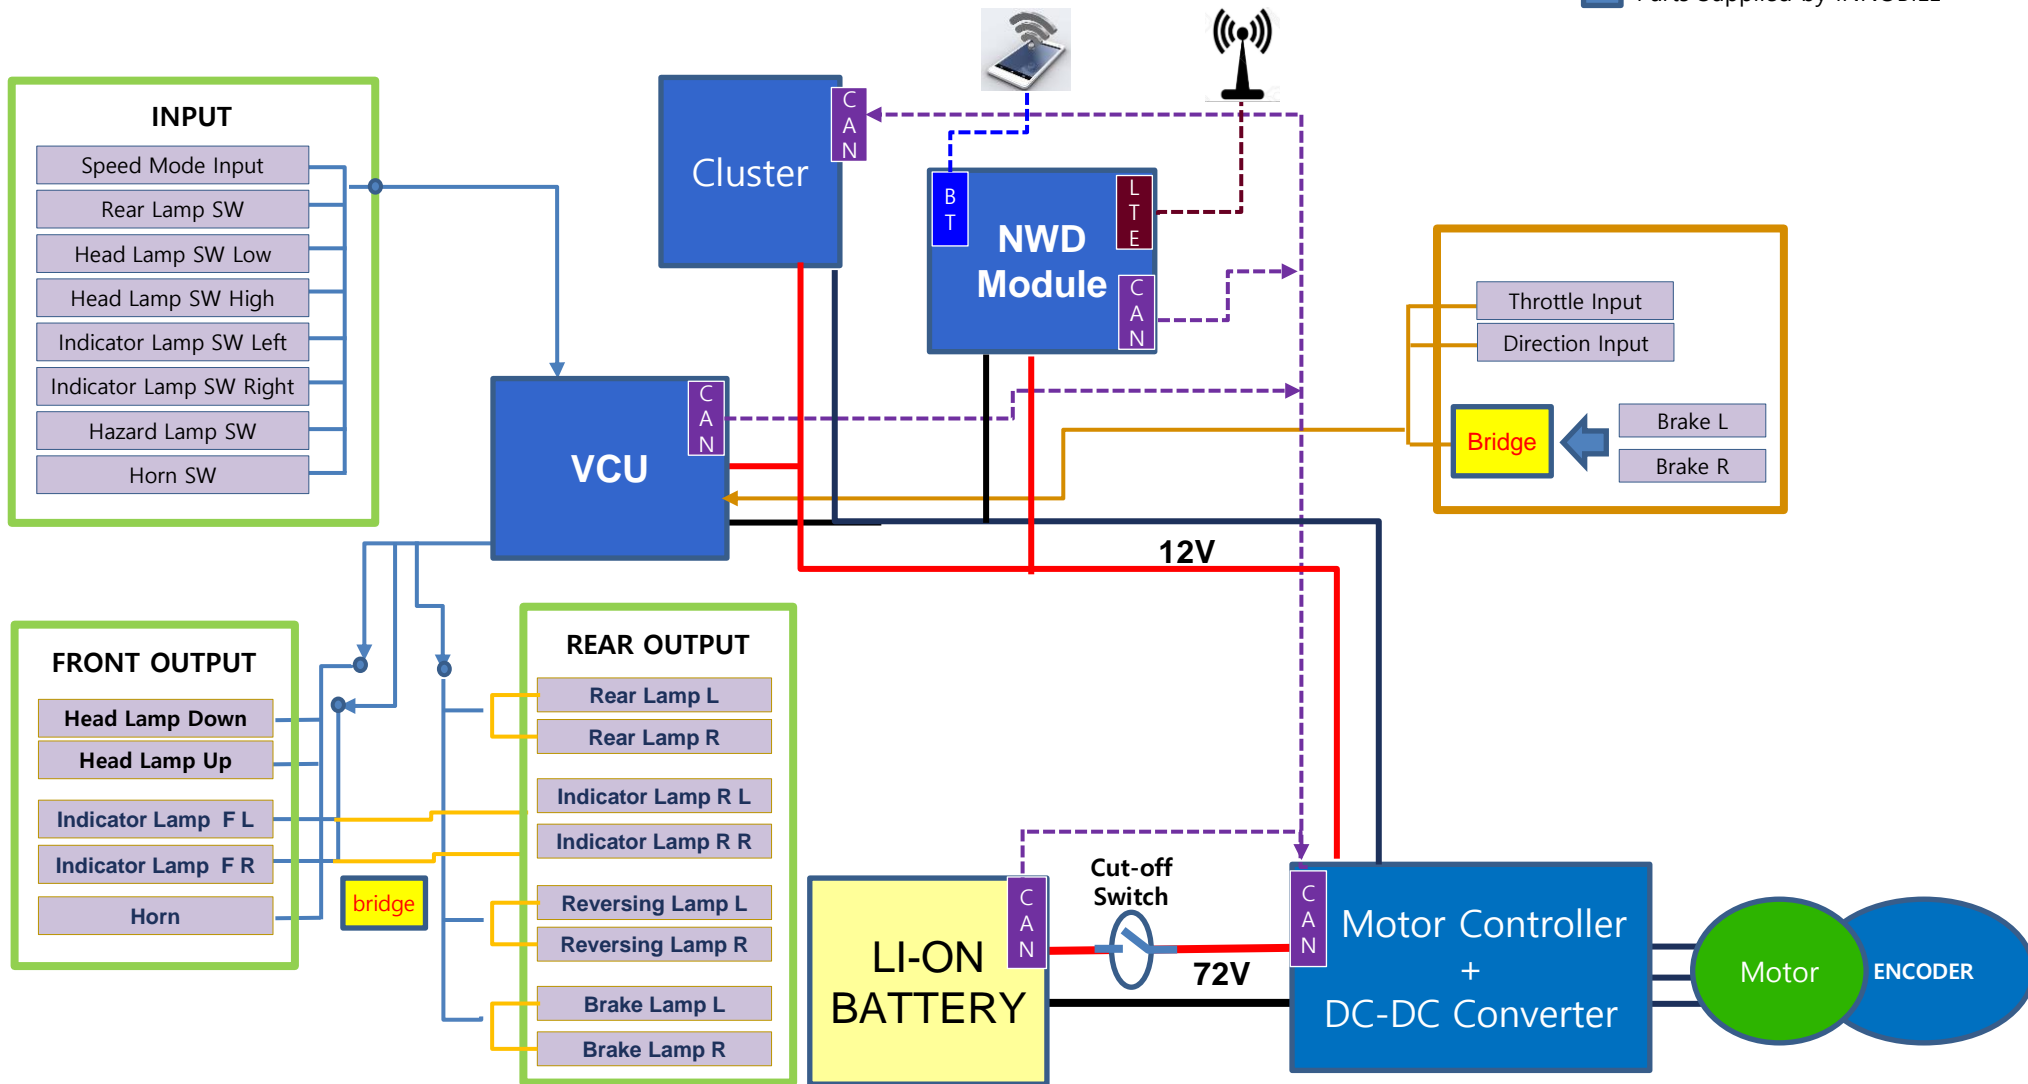

Parts Supplied by INNOBILE

** Illustration : Above system is based on Lithium-ion Battery.
CAN Communication is not applied for battery and motor controller in Lead Acid Battery system.

CAN-based 2 in 1 System : Micro EV (Standalone or Connected)

Parts Supplied by INNOBILE

** 2in1 Module is based on water-cooling system

Customized development system.

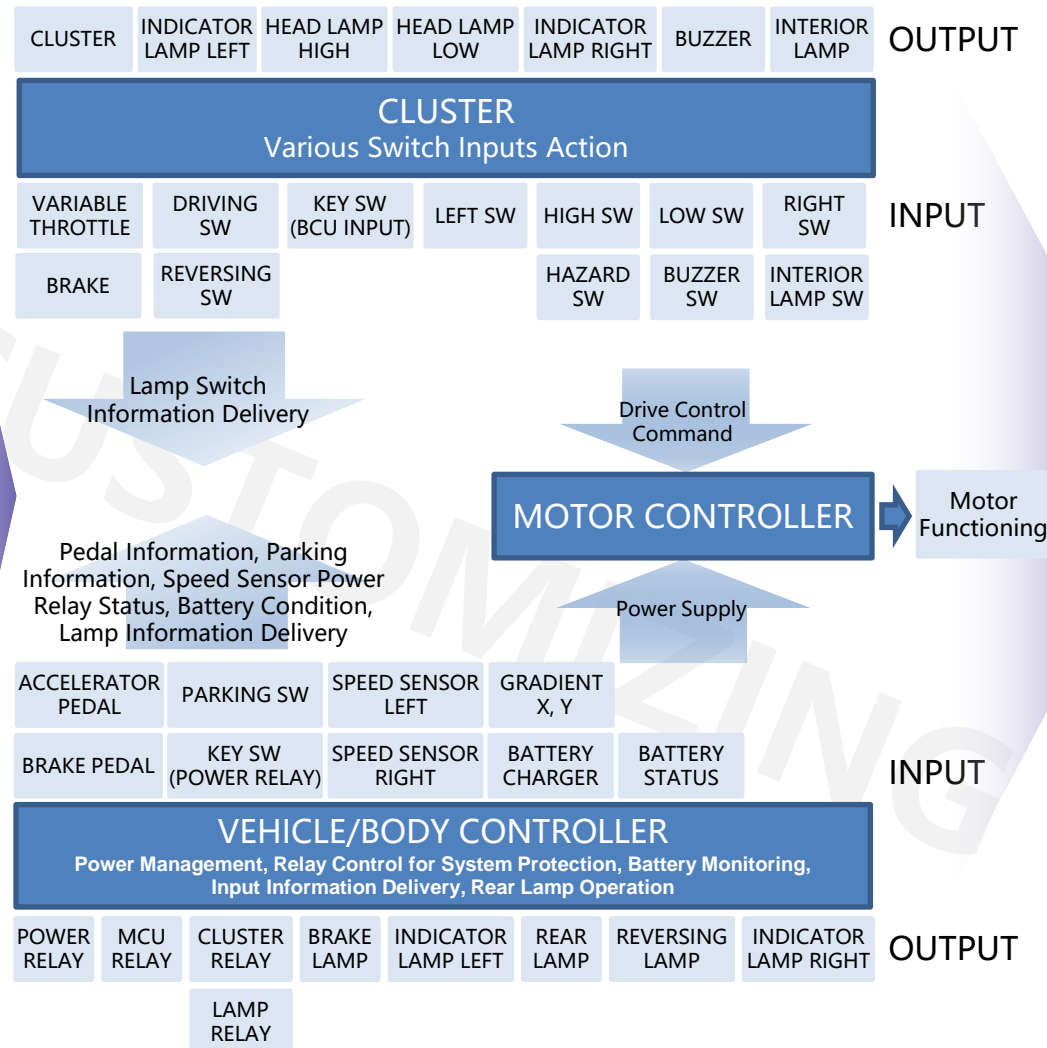

Vehicle Types
Electric Two-Wheel Vehicle
Micro-EV

Motor Classification
