

## Company Introduction

Huconn Co., Ltd. was established in December 2015 and contains a management ideology aimed at valuable technology that connects the world with 'Hu' of 'Human' and 'CONN' of 'Connectivity'.

By utilizing our high-level research manpower and network, we have been continuously developing technologies until now, and through this, we are the first SME (small and medium-sized enterprise) in Korea to receive functional safety certification for battery management systems.

## | PRODUCTS |

### Ⓣ Manito Charger

'Manito Charger' consists of a battery management system based on functional safety design for high safety and a battery cell control system using a cell balancing algorithm and a wireless communication module, and a high safety mobile electric vehicle charging battery pack device with a guaranteed safety PCS and inverter.

- A portable electric vehicle charger equipped with batteries.
- Up to 20kW can be charged. / Support for 7kW slow charging (level2)
- Safe charger that does not cause fire with functional safety technology
